Medjacking: Medical Device Hacking

You can't outsource accountability! ...

... as it is our responsibility to
ask for information security **changes**
as **computer security** will be the
security of the world.

The image features a central graphic of four interlocking hexagons. The top-left hexagon is white with a blue border and contains the text 'TO TRANSFORM'. The top-right hexagon is light blue with a white border and contains the text 'TO SECURE'. The bottom-left hexagon is light purple with a white border and contains the text 'TO COACH'. The bottom-right hexagon is white with a blue border and contains the text 'TO COACH'. The background is a collage of business-related imagery: a person in a white shirt pointing at a laptop screen, another person's hand writing on a notepad, and various data visualizations including line graphs, pie charts (with values like 90%, 25%, 50%, 75%), and icons of computers and mobile devices. The overall color palette is dominated by blues, purples, and whites, with a warm orange glow emanating from the laptop screen.

**TO
TRANSFORM**

**TO
SECURE**

**TO
COACH**

...people-centric security...
